

EDGECTP TARIFF TOOLS DESIGNED TO MAKE CROSS BORDER TRADING SIMPLE

Fully classify your product portfolio to clear customs efficiently, inform your customer at checkout of their order's estimated duties + taxes, and scan your customers for any restrictions before shipping goods.

Product Pre-Classification (PPC)

Goods flow smoothly through customs when you first use EdgeCTP to accurately classify your goods into World Customs Organization recognized Harmonized System (HS) codes and destination country-specific Fully Qualified (FQ) codes.

Fast Bulk Products Classifications

Got more than a handful of products? 100s or 1000s? No problem - use EdgeCTP and our Excel loader to bulk submit all of your products for pre-classification, which are carefully classified by human curators within hours of submitting.

Restricted Party Screening (RPS)

Knowing who you are sending goods to is a compliance obligation you cannot afford to ignore. Use EdgeCTP to verify your customer's eligibility to receive your goods before sending to avoid customs impound fines, reputation-damaging exposure, etc.

Estimated Duties + Taxes (EDT)

Prevent buyer's remorse and reduce returned goods by providing estimated duties and taxes at the checkout, showing the landed cost of goods, i.e. Delivery + Duty Paid (DDP). This allows customers to make an informed buying decision.

Custom Online + eCommerce Stores

Whether you have a custom online store or are using a standard eCommerce platform such as Shopify, use EdgeCTP to enhance your store with the PPC, EDT and RPS tariff tools, and begin delivering the benefits of an internationally compliant buying experience.

API Connections for Flexibility

Want PPC, EDT + RPS in your own online systems, stores or wider eCommerce platforms such as BigCommerce, Magento, Etsy, etc? Use EdgeCTP's REST API or JavaScript SDK to establish a system-to-system connection and tap into the tariff tools. Get in touch via support@edgectp.com

Combined Trading Platform

1. INSTALL INTO SHOPIFY

To use our Tariff Tools within Shopify, install EdgeCTP into your Shopify store. If you go to the Shopify App Marketplace and search for "EdgeCTP", installation is simple and easy. **Apps > Customize your store > EdgeCTP.**

2. SIGNUP TO EDGECTP

To enable the Tariff Tools functionality within your Shopify store, please create an EdgeCTP account. **Apps > EdgeCTP > SIGN UP.** To complete setting up your account, please follow the instructions in our email to 'ACTIVATE MY EDGECTP ACCOUNT.'

3. CONNECT TO TARIFF TOOLS

To complete setting up Tariff Tools for use in your Shopify store, login to your Shopify store admin. **Apps > EdgeCTP >** and make sure to fill in the two fields: **EdgeCTP Tenant/Merchant ID** and **EdgeCTP Public API Key.**

Key questions:

How complicated is it to get started with EdgeCTP?

Simple. It's just like installing any other app from the Shopify App Store and only takes about 5-10 mins. Use our step-by-step guides to get started at no cost.

Do I need to use all 3 services or can I use only 1?

Use any one of the services that best suits your needs. For a limited time, we're slashing our charges to make deciding on a service(s) easier.

Must I get all my products pre-classified BEFORE estimated duties + taxes will work?

EDT will work with each product's HS Code (first 6 digits) in Shopify OR use our professionally pre-classified, destination country + product specific HS Code (fully qualified 10 digits).

Will my agreed shipping carrier rates appear on Shopify?

Yes, your pre-agreed shipping carrier rates will show on the Shopify checkout with estimated D+T. Follow the simple steps, in our guide, to add your logistic carrier details into EdgeCTP.

Is a custom store front supported or an API provided for my own system connection?

Yes, the Shopify Liquid based store front and checkout is supported. Additionally, we provide REST APIs, so you can connect PPC, EDT and RPS services right into your system(s).
